

UD TRUCKS

# Built To Go

## Attenuator Truck

### UD PK16 250

- 8T Automatic Cab Chassis • 15,500kg GVM • 7lt Engine 250hp/180kW – 716NM
- 5 Speed Allison Automatic • Spring Suspension • Touch Screen Sat Nav
- Bluetooth • Air Conditioning • ABS and Air Park Brake

### Scorpion TL-3 Truck Mounted Attenuator

The Scorpion Truck Mounted Attenuator (TMA) is mounted to a shadow vehicle for purposes of protecting the work crew in front of the shadow vehicle and protecting the motorist that might drive into the lane closed off by the shadow vehicle. The TMA is designed to conveniently fold up and over the truck bed during transport and storage.

The compact design and balanced weight distribution makes it ideal for high-speed travel. Provides impact protection up to 100 km/h. The strut section folds to a vertical position

adjacent to the truck bed, while the cartridge section folds to a horizontal position parallel to the bed.

WA Built and assembled here locally in Perth by Paul and Warner Body Builders. Paul & Warner is Australia's premier supplier of Emergency Response vehicles and associated Road Safety Equipment. Established in 1956 and proudly West Australian owned Paul and Warner Body Builders has built a reputation of excellence upon a foundation of quality workmanship, customer service & local back up second to none.
